30 Sep 14 - 30 Sep 15	11.5%	16%	7%	33%	17.5%	9%	12%

### Analysis

When compared to 2009 – 2014 data, paper PTA reliability has improved in all areas except immigration and asylum JR and family appeals. It should be noted, however, that all LiP child PTAs are listed immediately without a paper stage so the results above are based on only a small number of cases (67 family appeals over 5 years). The most significant improvements are in QB High Court, county court and non-immigration and asylum JR appeals.

When comparing data collected on 7<sup>th</sup> July 2015 to data collected on 30<sup>th</sup> September 2015, reliability has slipped in some areas and improved in others. The only really significant improvement is in QB High Court appeals.
